

Legacy Weddings

Fine wedding videography and state-of-the-art editing captures your special day and digitally archives it for years to come.

Wedding

At the ceremony, a two-camera shoot captures every moment. We arrive at the wedding two hours beforehand to take setup shots, check the lighting and prepare for your big entrance. Once the ceremony begins, we capture every moment from the guests arriving and the processional to the kiss and the grand exit. Two cordless microphones are provided (one at the alter and one at the groom) to record the audio. During the ceremony, the videographer will shift locations to capture different angles and shots, however we do follow the wishes of the facility.

Reception

Normally, we arrive at the reception one hour beforehand and utilize a one-camera shoot. The videographer will film the introduction of the wedding party, cake cutting, table setting, the toasts, 1st dance, father-daughter dance, mother-son dance, bouquet and garter, as well as dancing throughout the evening. Traditionally, we stay at the reception until we have captured an hour of tape.

If requested, we can do interviews with guests, as well as any special events you may wish captured.

Editing

Legacy Weddings utilizes state-of-the-art digital editing. We edit the wedding and reception, touching upon the key moments of the celebration, to offer an enjoyable and cohesive viewing experience. We will work with the couple to include additional requested moments.

After adding titles, transitions and a music soundtrack, your video will be complete. If you wish, you can lead off your wedding with Life's Photos, featuring childhood photos of the bride and groom, and a music soundtrack.

Legacy Weddings Pricing:

- Wedding and reception with editing \$1295
- Wedding only with editing \$700
- Reception only with editing \$500
- Life's Photos \$3 per photo (50 photos minimum)
